

Cupra Formentor. Your car, decoded.

A clean, print-friendly premium report built from the factory data of the

**CUPRA Formentor HYBF
FOR VSSZZZKMZNR035XXX**

Plug-in hybrid edge

Electrified performance with a sportier chassis brief than most compact SUVs.

Daily usability

Strong tech, camera systems, comfort features and practical ownership value.

Exact spec

Brochure presentation up front, complete code appendix at the back.

VIN VSSZZZKMZNR035XXX	MODEL Formentor HYBF CUPRA FOR	YEAR 2022	PRODUCTION 24.01.2022
ENGINE DGEA	TRANSMISSION TTT	SALES TYPE KM7CVY	PAINT S7 /S7H

TOP 10

The 10 most interesting things about this specific Formentor

Selected from the factory data because they add genuine value, character or usability to this exact configuration.

0K3 / 20D / ML9

Plug-in hybrid performance with real substance

This Formentor is not just electrified on paper. The PHEV setup combines a 1.4TSI base with electric support for a 180kW system output,

210 / UB1 / ON4

Adaptive chassis with proper rear suspension

Adaptive chassis control, sports rear dampers and a 4-link rear setup give this car a more serious dynamic foundation than many

giving it both low-speed smoothness and genuine performance punch.

mainstream crossovers. That matters every single time the road stops being perfect.

8T8 / 616 / 79H

Strong driver-assistance package

Adaptive cruise control, advanced lane support, emergency assist and rear traffic monitoring make this a very modern long-distance and daily-use car. It feels better equipped than the average sporty compact SUV.

KA6 / PCT / 7X5

Serious parking and camera support

Area View, multiple cameras and Park Assist take a lot of stress out of tight spaces. For a car with sporty styling and daily-family usability, that is exactly the right kind of premium convenience.

81Y / 8VM / 915

Full LED lighting presence

LED headlamps with lens technology, dynamic LED rear lamps and automatic light control give the car a sharper premium identity. It looks more expensive because the lighting package genuinely is better.

7UG / 8AW / PMK

High-level infotainment core

Navigation High, modern MIB3 architecture and Full Link make the cabin feel current instead of dated. This is one of the biggest value points in the whole spec.

KH7 / 4A3 / QQ9

Comfort spec with everyday payoff

Three-zone climate control, heated front seats and ambient lighting improve daily ownership far more than flashy options with little real-world value. This is the kind of equipment you keep appreciating.

2FT / Q1D / 7P4

Sporty interior where it counts

A heated multifunction steering wheel, sports seats and lumbar support tie the Cupra character to genuine usability. It feels sport-focused without becoming tiring.

PYA / 40S / Q48

19-inch visual stance with Cupra identity

The 19-inch wheel setup and Exclusive Sports Black/Copper wheel design give this specific car much more showroom presence. It is one of the clearest visual differentiators of the build.

WDL / QR9 / 8J3

Smart safety hardware worth having

The Safe & Driving package XL, road sign recognition and front collision braking support are the sort of systems that add trust and future-proof feel. They make the car easier to recommend, not just easier to sell.

Why this spec works: it blends sporty Cupra character with equipment that actually improves ownership – hybrid performance, strong assistance tech, useful comfort features and a media setup that still feels modern.

All codes

Performance, Hybrid & Chassis

This Cupra is built around a more interesting technical recipe than a normal compact crossover: plug-in hybrid thrust, sports-minded chassis hardware and a drivetrain that aims to feel both quick and refined.

Standout combination: the PHEV drivetrain, adaptive chassis control, camera-rich parking hardware, advanced assistance systems, heated sport-oriented cabin touches and strong infotainment package create a much more complete car than the average sporty compact crossover.

Advice for this exact configuration

PHEV battery and charging habit

A plug-in hybrid rewards regular charging and sensible use. If the car is almost never charged, you lose much of the refinement and efficiency that make this configuration attractive in the first place.

TSI engine maintenance

Even in a hybrid, the petrol engine still deserves high-quality oil and disciplined servicing. Shorter oil intervals than the maximum factory schedule are often the safer long-term choice.

DSG / transmission behavior

The automatic transmission should feel clean and predictable. Hesitation, jerky take-up or inconsistent low-speed behavior are worth checking early rather than ignoring.

Cooling and thermal systems

On modern hybrid and turbocharged drivetrains, stable coolant behavior matters. Any unusual temperature fluctuation, warning light or loss of heating/charging performance deserves immediate attention.

Tires, alignment and chassis freshness

This car's handling quality depends heavily on tires, alignment and suspension condition. On a sporty setup with 19-inch wheels, tired rubber can make the whole car feel worse than it really is.

Source-based technical view: The attached source notes describe this DGEA/TTT configuration as technically strong, with a smooth and powerful turbocharged setup, sharp handling and a capable DSG-style driving character, while also warning to watch oil quality, cooling components, intake carbon buildup and transmission behavior over time.
