

Peugeot 208. Your car, decoded.

A European-market Peugeot 208 5-door finished in Blanc Perlé Nacré pearl paint, configured around low fuel consumption, practical daily use and the efficient EB2F PureTech petrol engine.

Efficiency-led setup

60 kW EB2F petrol power, low-consumption coding and Michelin low rolling resistance tyres.

Connected compact

Touchscreen navigation, MirrorLink, Wi-Fi and hands-free phone support add real usability.

STEERING
Left-hand drive

The 10 most interesting things about this specific Peugeot 208

These are the features that most strongly define the vehicle's economy, usability, cabin technology and day-to-day ownership appeal.

EB2F PureTech petrol engine

The 60 kW EB2F petrol engine gives this 208 the lightweight, efficient character that suits the model best. It is a sensible configuration for daily driving, low running costs and European city use.

Low-consumption vehicle setup

The vehicle is specified with a low-fuel-consumption target group and extremely low rolling resistance tyres. That combination makes the car especially relevant for owners who value predictable economy.

Pearl Blanc Perlé Nacré paint

The EFC three-layer pearl metallic paint gives the compact body a more premium visual presence than a standard solid white finish. It is one of the specification details that makes the car feel more polished.

Navigation with colour touchscreen

A colour-screen navigation system and touchscreen interface lift the cabin above a basic city-car specification. It gives the interior a more modern and useful daily-driving feel.

MirrorLink and Wi-Fi connectivity

MirrorLink and Wi-Fi support add a connected layer to the infotainment system. For a compact Peugeot of this period, this is a meaningful convenience feature.

Cruise control and speed limiter

Programmable cruise control and speed limiting improve comfort on longer journeys and help control speed in urban or regulated zones. It is a practical feature that adds real day-to-day value.

ESP with ABS safety foundation

The Teves MK100E ESP system, ABS and associated braking hardware provide the core active-safety framework. This matters because small cars benefit strongly from confident electronic stability support.

Air conditioning and cooled glovebox

Simple air conditioning, standard air-conditioning lines and a cooled storage compartment give the cabin better everyday comfort. This configuration is practical rather than excessive.

Split-folding rear bench

The separately folding rear seat gives the 208 more flexibility for mixed passenger and luggage use. It makes the compact five-door body easier to live with.

European cold-climate preparation details

The specification includes cold-country climate coding, correct refrigerant, heated exterior mirrors and engine-side sound insulation. These small details improve usability in normal European ownership.

Standout combination: pearl white paint, PureTech petrol efficiency, touchscreen navigation, MirrorLink, cruise control, ESP, air conditioning and a practical five-door body create a sensible but well-equipped compact Peugeot.

Key specification by category

The strongest parts of this 208 come from how its efficient petrol drivetrain, useful comfort equipment, connected infotainment and compact European-market specification work together.

Standout combination: EB2F PureTech engine, MA5 manual gearbox, pearl paint, touchscreen navigation, MirrorLink, Wi-Fi, ESP, programmable cruise control and practical five-door packaging define this Peugeot 208 as an efficient daily-use specification.

Advice for this exact configuration

The value in this 208 sits in its efficient PureTech drivetrain, pearl paint, compact usability and electronic convenience systems, so condition and function checks matter as much as the equipment list.

PureTech maintenance discipline matters

The EB2 petrol engine is at its best when oil quality, service intervals and cooling-system condition are taken seriously. For ownership confidence, maintenance history is more important than the small engine size suggests.

Pearl paint requires careful repair matching

EFC Blanc Perlé Nacré is a three-layer pearl finish, which gives the car a premium look but can be harder to match after body repairs. Paint condition and previous repair quality deserve close inspection.

Connectivity is useful but period-specific

MirrorLink, SMEG navigation and Wi-Fi support are valuable for the model year, but compatibility with modern phones can vary. A live test of the touchscreen, USB input and navigation is worthwhile.

Manual drivetrain should feel light and clean

The MA5 manual gearbox and hydraulic clutch should operate smoothly without crunching, vibration or a high clutch bite point. Any roughness usually deserves attention before purchase or resale.

Tyres influence the character strongly

The specification uses Michelin extremely low rolling resistance tyres in 185/65R15 size. Keeping a similar quality tyre helps preserve the intended efficiency, comfort and braking balance.

Check electronic comfort functions

Heated mirrors, cruise control, touchscreen, hands-free phone functions, lighting automation and tyre-pressure monitoring all contribute to daily value. They are simple items, but together they define the usability of this specific 208.

Ownership focus: this is a left-hand-drive Peugeot 208 for South and Western Europe, specified with EB2F petrol power, MA5 manual transmission, EFC pearl white paint, Euro 6.1 emissions coding, navigation, MirrorLink, Wi-Fi and practical comfort equipment.

All codes and descriptions

Every coded or descriptive entry that defines this Peugeot 208 is listed below, including standard equipment, absence-of-option entries, market configuration, production differentiation and technical setup.

CODE / ENTRY	DESCRIPTION	CATEGORY
COMFORT & INTERIOR		
Air conditioning	Simple air conditioning	Comfort & Interior
Air-conditioningcompressorExternal	variablecompressorwithout clutch	Comfort & Interior
Air-conditioning lines	Standard air-conditioning lines	Comfort & Interior
